# Perfekt ausgestattet. Perfectly equipped.

- DE Stimmungsvolle Beleuchtung und funktionelles Licht haben im Schlafraum besondere Bedeutung. Blendfreie Helligkeit für gute Sicht und eine atmosphärisch angenehme Hintergrundbeleuchtung lassen sich bei ELUMO II auf vielerlei Art einplanen: am Bett, in den Konsolen oder – ganz klassisch – als farblich passende Tischleuchte.
- EN Both ambient and functional lighting have a special significance in the bedroom. Glare-free brightness for good visibility and beautiful background lighting can be provided by ELUMO II in different ways: at the bed, inside the consoles or by a classic colour-coordinated table lamp.

- DE Zwei der attraktiven Beleuchtungsoptionen bei ELUMO II: Das Ambientlicht am Kopfteil und die Bettseitenbeleuchtung mit Bewegungssensor. Auch das offene Fach und das Schubladeninnere der Konsole können auf Wunsch beleuchtet werden. Das Licht wird seitlich per Touch-Funktion oder mittels Funkfernbedienung an- und ausgeschaltet. Die Tischleuchte wird über einen mechanischen Zugschalter betätigt.
- EN Two of the attractive ELUMO II lighting options: the ambient lighting at the headboard and the bedside lighting with motion sensor. If required, the open compartment and the inside of the console drawer can also be lit. The light can be switched on/off using the touch function at the side or remote control. The table lamp is operated via a mechanical pull switch.

DE Alle Schubladen können auf Wunsch mit Innenbeleuchtung ausgestattet werden.

EN All of the drawers can be fitted with interior lighting upon request.

DE 3-4 – Die obere Schublade verfügt über hülsta-SoftFlow. Sie lässt sich daher besonders leicht öffnen und schließt mit gedämpftem Selbsteinzug. Die unteren Schubladen sind jeweils mit Push-to-open-Technik ausgestattet. Die zurück-springende Blende ist wahlweise in Holz- oder Lackausführung, aber auch in Kunst- oder Echtleder erhältlich.

EN 3-4 – The upper drawer features hülsta SoftFlow, ensuring particularly easy opening and automatic soft-closing. The lower drawers are fitted with push-to-open technology. The recessed panel is optionally available not only in wood or lacquer versions but also in artificial or genuine leather.

2

DE 1 – Diese 160 cm breite Kommode – wahlweise in Holz- oder Lackausführung – hat einen getönten Glasausschnitt in der Abdeckplatte. Die Schublade darunter zeigt dank der LED-Beleuchtung im mittleren Segment ihren schönen Inhalt im allerbesten Licht.

2 – In die schmalen Fächer hinter der unteren Schubladenfront der Konsole können stoffierte Ablageschalen eingesetzt werden.

EN 1 – This 160 cm wide chest – optionally available in wood or lacquered finish – features a tinted glass section within the cover surface. The LED lighting in the central section ensures that the drawer underneath shows off its contents in the best possible light.

2 – The small compartments behind the lower console drawer front offer space for fabric-covered storage boxes.

**DE** An die Wand stellen oder nicht – das ist die Frage beim Kopfteil. ELUMO II bietet beide Optionen. Wenn Sie das Kopfteil Ihres Bettes als Raumteiler einsetzen wollen, wird es rückseitig mit besonderem Aufwand bearbeitet. Nicht möglich bei Funktions-Polsterkopfteil A.

**EN** The headboard can be positioned against the wall or be freestanding. ELUMO II offers both options. Should you wish to use the headboard as a room divider, it will be elaborately finished at the rear. Not possible for upholstered functional headboard type A.

**Important notes:** Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class (C12/15). For other materials (please see separate materials table in the wall composition chapter) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site.

Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used.

For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

## Notes on planning hinge-door wardrobes according to the endless assembly principle

consisting of basic and extension units. Due to the various element widths one can create many total wardrobe widths. In this way the available floor space can be exploited to the full. For each wardrobe combination, the first element on the left is considered to be the basic unit, incorporating both outer side-sections. One can only include one basic unit in each combination. When adding on extension units, the right-hand side-section of the basic unit is employed as the end side-section of the complete combination. In the case of single-door hinge-door units one can choose between left- and right-hand hinges. The graphics shown below give you an excerpt from our wardrobe assortment.

Standard interior fittings per unit: 2 fitted shelves, 1 clothes rod.  
All interior surfaces are in white lacquer version.

**Remote control unit**

A 4-channel radio remote control unit (= transmitter), which is charged extra, is also available as an alternative to the standard switch. Several lights (up to a total load of max. 400 W per channel) can be switched on and off with each of the 4 channels. It is also possible to switch all channels on and off simultaneously with the “all on” or “all off” buttons. Up to 4 receivers can be operated with one radio remote control unit. **Transmitters and receivers must be ordered separately.** The footswitch is omitted when the radio remote control unit is employed.

**Please be sure to observe the information and notes given in the “Switch options for lamps” chapter in the “Bedrooms” type list!**

**NEW Magic-Tronic**

The lamps are normally operated by an external footswitch. As an alternative we can also provide a **Magic-Tronic** switch, which is charged extra. By “stroking” the outer or top side of the unit at the same level as the invisible integrated sensor it is possible to switch all the lamps on and off (“Stroking method”). As an alternative the position of the hidden sensor can also be marked with a small metal plate on the furniture unit (“Marking method”). Lamps with a maximum power of 200 W can be operated by a Magic-Tronic unit (230 V). The footswitch is omitted when a Magic-Tronic unit is included.
